Web Development Experience

Mapcom Systems, Richmond, VA
Web Developer, 2011-Present
Develop and manage a web-based mapping application, Web Console

- Co-developed and maintained a dynamic, secure web mapping application using the .Net Framework, C#, JavaScript, JQuery, SQL, CSS, HTML, AJAX, and Telerik ASP.Net controls. Used SQL geospatial data to display mapped elements as well as integrate database functionality to view the data behind mapped elements, measuring tools, Google API integration to include driving directions.
- Previously responsibilities included software support to clients (over 12 different modules to support), client and internal database management, technical writing for user manuals, creating and executing testing procedures within the software development life cycle, top-level troubleshooting of data integration issues with the web applications, deployment and

configuration of the web applications, user documentation of the web applications, and SQL database development.

- Responsible for over 100 product enhancements between various products.

- Built an internal mailing website for Support to automate the sending of reply emails using HMTL, CSS, JavaScript, and PHP.

- Responsible for increasing application performance. After re-factoring much of the code, map features went from 10-13 seconds of load time to 1-3 seconds.

Other Work Experience

Best Buy, Fredericksburg, VA

Counter Intelligence Agent-Geek Squad, 11/2010-8/2011

Geek Squad counter personnel.

- Responsible for selling computers and services to clients, performing operating system installation, data backups, troubleshooting operating systems for virus infections and hardware malfunctions, troubleshooting all computer related devices (video, sound, modem, printer, scanner, camera, etcetera).

Danny Marshall Election Campaign, Danville, VA

Campaign Staff, 07/2009-11/2009

Hired to walk door to door but was asked to stay on after the initial campaign to perform additional duties.

- Canvassed neighborhoods within Delegate Marshall's voting district to collect information from voters, responsible for answering phones to answer voter questions about Delegate Marshall, as well as other general office work such as typing, copying, etc.
